### SARS CoV 2 (COVID-19) Tests

Test Name	Result	Reference Range	Lab
SARS CoV 2 RNA(COVID 19), QUALITATIVE NAAT			TXC
<b>SARS CoV 2 RNA</b>	<b>DETECTED</b>		

A Detected result is considered a positive test result for COVID-19. This indicates that RNA from SARS-CoV-2 (formerly 2019-nCoV) was detected, and the patient is infected with the virus and presumed to be contagious. If requested by public health authority, specimen will be sent for additional testing.

REFERENCE RANGE: NOT DETECTED

Please review the "Fact Sheets" and FDA authorized labeling available for health care providers and patients using the following websites:  
<https://www.questdiagnostics.com/home/Covid-19/HCP/QuestLDT/fact-sheet> <https://www.questdiagnostics.com/home/Covid-19/Patients/QuestLDT/fact-sheet.html>

This test has been authorized by the FDA under an Emergency Use Authorization (EUA) for use by authorized laboratories

Due to the current public health emergency, Quest Diagnostics is receiving a high volume of samples from a wide variety of swabs and media for COVID-19 testing. In order to serve patients during this public health crisis, samples from appropriate clinical sources are being tested. Negative test results derived from specimens received in non-commercially manufactured viral collection and transport media, or in media and sample collection kits not yet authorized by FDA for COVID-19 testing should be cautiously evaluated and the patient potentially subjected to extra precautions such as additional clinical monitoring, including collection of an additional specimen.

Methodology: Nucleic Acid Amplification Test  
(NAAT) includes RT-PCR or TMA

Additional information about COVID-19 can be found at the Quest Diagnostics website: [www.QuestDiagnostics.com/Covid19](http://www.QuestDiagnostics.com/Covid19)
